2. CITATIONS AND EXPLANATIONS

Claims 1-17 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest: "determining the respective carrier tracking loop frequency offset corresponding to each channel in the receiver; storing each of said carrier tracking loop frequency offsets as first offsets; determining the respective symbol timing recovery frequency offset corresponding to each channel in the receiver; storing each of said symbol timing recovery frequency offsets as second offsets; and retrieving said first and second offsets corresponding to the desired channel, said demodulator thereby using said recalled offsets for starting acquisition of said desired channel". All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
